# Overview

Energy Systems & Services Holdings is committed to delivering specialised services, intelligent solutions and logical approaches to effectively assist property managers in the areas of building compliance and services reliability as well as support the rational use of energy across their portfolios.

Energy Systems & Services Holdings is a dynamic and innovative company offering a comprehensive suite of specialised professional and project services for the Facilities Management Industry and the Commercial Property Sector.

## Management Team

The management team at Energy Systems & Services Holdings consists of building services engineers, company directors, former NSW government agency Facilities Managers and switchboard technicians.

Energy Systems & Services Holdings can expand and contract to meet customer and project demands via our own dedicated staff or the deployment of our key alliance service provider partners.

## Our Vision

1. To provide client focused and tailored solutions to enhance the performance of power distribution equipment through continuous commissioning using our series of condition auditing, site rectifications and monitoring techniques.
2. Nationally, encourage the rational use of energy through energy and power quality management via maintained energy management systems.
3. Drive innovative processes and systems, aided by technology to provide overall clarity in both energy systems and commercial property maintenance and building systems.
